

KAVYA BASAPPA

Data Engineering Intern | Analytic Engineer | Available May 2026

Paris, France | kavyamona777@gmail.com | +33 0745117684 | LinkedIn | GitHub | English (B2) · French (A1, in progress)

PROFILE

Master's student in Data Engineering & Cloud Computing (aivancity Paris) with 3+ years of experience in data quality and pipeline development. Skilled in Python, SQL, Azure, Spark, and Kafka with hands-on project delivery in ETL, real-time streaming, and AI-driven applications. Seeking a Data Engineering or Analytic Engineer internship from May 2026.

TECHNICAL SKILLS

Languages: Python · SQL · Advanced Excel (VLOOKUP, Pivot Tables)
Data Engineering: Apache Spark · Apache Kafka · ETL · Data Pipelines · dbt · Azure
BI & Visualization: Power BI · Streamlit · Data Analysis & Visualization
Tools & Cloud: Docker · Git · Azure · Big Data Frameworks
Soft Skills: Communication · Teamwork · Adaptability · Time Management

WORK EXPERIENCE

AI Product Developer Intern | Aivancity School — AI Clinic July 2025 – Sept 2025

- Built a secure React/Flask platform with JWT authentication and role-based access, ensuring 100% data integrity for educational challenge management.
- Engineered an LLM-driven semantic grader automating Python code evaluation and feedback, reducing manual grading time by an estimated 85%.
- Integrated a Deep Evaluation microservice via Streamlit providing automated security scans and AI insights, increasing code analysis depth by 60%.

Data Quality Analyst | Evolve BPM Pvt Ltd Dec 2021 – Oct 2024

- Extracted, validated, and enriched 10K+ B2B lead records weekly, improving data completeness by 30% (job titles, company size, social profiles).
- Implemented SQL and Excel-based data cleansing and deduplication workflows, cutting duplicate leads by 40% and sustaining 95%+ accuracy.
- Conducted quality control checks (completeness, accuracy, consistency, validity) reducing processing errors by 25% and boosting validation efficiency by 20%.

PROJECTS

Voice-Scaffold — Infrastructure Automation Tool Feb – Mar 2026

Tech: Python · Docker Compose · NLP · AST · Speech-to-Text

- Converts voice or text architecture descriptions into validated infrastructure definitions and runnable Docker Compose environments end-to-end.

Real-Time Crypto Streaming Pipeline 2025

Tech: Apache Kafka · Apache Spark Structured Streaming · Streamlit · Docker · Python

- Built an end-to-end pipeline ingesting live BTC/ETH/SOL prices from Binance via Kafka, processing 1-minute window aggregates with Spark watermarking.
- Delivered a Streamlit dashboard with live KPI charts, symbol trend lines, and a real-time event tape; fully containerised with Docker Compose.

Leaf Disease Detection — Deep Learning 2024

Tech: PyTorch · ResNet18 · Transfer Learning · Python

- Trained a ResNet18 model on imbalanced plant disease data; applied transfer learning and weighted loss to classify bacterial vs fungal infections.

EDUCATION

MSc Data Engineering & Cloud Computing Nov 2024 – Present

Aivancity School for Technology, Business & Society — Paris, France

Bachelor's of Computer Science July 2018 – April 2022

St. Joseph's College (Autonomous) — India
